Education

DIT University, Dehradun Aug 2025 – May 2029
Bachelor of Technology in Computer Science Engineering CGPA: 9.1/10

Experience

Member, CSI DITU Apr 2025 – May 2026

- Skill Development and Learning
- Collaboration and Teamwork
- Active Participation in Technical Activities

Member, CodeGenX Sep 2025 – May 2026

- Innovation & Growth Mindset
- Contribution to Tech Community
- Exploring Real-World Tech Applications

Contributor, Elite Coders Jan 2026 – Mar 2026

- Solved **50+ DSA problems**, strengthening algorithmic thinking and coding efficiency
- Applied data structures and algorithms to real-world problem scenarios

Projects

Calculator Web Application
HTML, CSS, JavaScript

- Engineered a responsive calculator supporting arithmetic operations with intuitive interface
- Applied validation logic to eliminate incorrect inputs and runtime errors
- Enhanced usability through clean layout and seamless interaction flow

Restaurant Management System
Python, Tkinter, SQLite

- Developed a Python Tkinter GUI application integrated with an SQLite database for managing restaurant orders.
- Automated bill calculation and record storage, improving accuracy and reducing manual errors.
- Demonstrates practical use of Python in building real-world desktop applications efficiently.

Portfolio Website
HTML, CSS, JavaScript

- Crafted personal portfolio showcasing projects, technical skills, and experience
- Achieved full responsiveness across devices and ensured cross-browser compatibility
- Refined user experiences using structured layouts and modern UI practices

Eventora
Vite, React, Typescript, Tailwind CSS

- Developed **Eventora**, a modern web application for managing events with a unified interface.
- Features include user authentication, event discovery, and team collaboration tools.
- Supports admin operations and real-time notifications for efficient event management.

Smart Attendance System
C++, IoT, Arduino, RFID

- A unique hardware-software project that integrates embedded systems with real-world automation.
- Demonstrates seamless interaction between hardware components and software logic.
- Highlights practical implementation of automation concepts in real-life scenarios.

Skills

Programming: C, Java, Python, JavaScript
Frontend: HTML5, CSS3, Responsive Design, UI/UX
Core Concepts: Data Structures, Algorithms, Object-Oriented Programming, Problem Solving
Web Technologies: HTTP, Client-Server Architecture
Tools: Git, GitHub, VS Code

Certifications

- Data Structures and Algorithms Fundamentals
- Web Development (HTML, CSS, JavaScript)
- INTRODUCTION TO KALI LINUX BASICS
